HOW IT WORKS

- Smart glove measures health data
- Patient presses a button to send a request
- Data is sent to caregiver's phone
- Medicine unit gives pills automatically

EVERYTHING WORKS IN
REAL-TIME.

ABOUT & PROBLEM

ABOUT THE PROJECT

HYGEIA is a smart IoT-based elderly care system that combines:

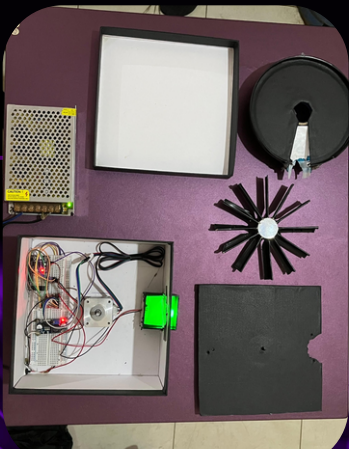

- ✓ Health monitoring
- ✓ Gesture-based communication
- ✓ Automatic medicine dispensing
- ✓ Mobile app monitoring

THE PROBLEM

Caregivers look after many patients.

Even small delays can be dangerous.

Current systems are not reliable and not complete.

MAIN FEATURES

SMART GLOVE

- Checks heart rate, oxygen, temperature
- Buttons to call caregiver

MEDICINE UNIT

- Gives correct medicine at correct time
- 24-slot automatic system

MOBILE APP

- Shows patient data
- Sends instant alerts

CONCLUSION

Final Message

HYGEIA helps caregivers, helps patients, and saves lives ❤️

Future Plans

- Fall detection camera
- Longer battery life
- Hospital system connection
